TRIPOD SETUP

Extend the tripod legs adjust the height to your personal preference. Take the tripod mount out of the tripod.

SECURING CAMERA MOUNT

Flip the mount upside down and line up the thread with the camera and tighten to secure the camera to the mount. The plate may be on the camera already.

CAMERA TILT

Loosen the handle to the tilt the camera. Tighten again to lock into place.

AV BRIDGE CART INSTRUCTIONS

CAMERA PAN

Loosen the wheel to pan. Tighten again to lock into place.

CAMERA RAISE

Turn the lever on the side to raise the camera higher if needed.

CONNECT DEVICES

Use the provided USB cables to plug in the camera + microphone. Attach the USB extender if you need to lengthen either the camera or mic cable.

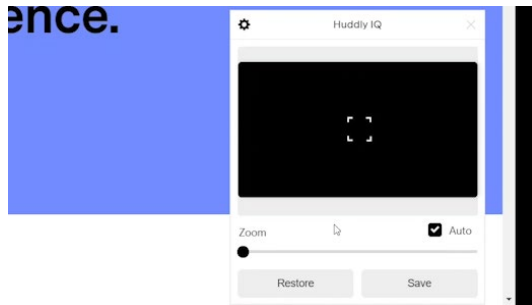

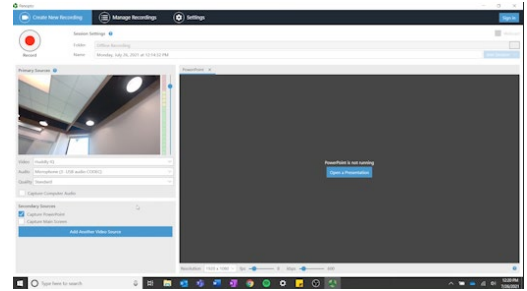

MICROPHONE

Please seat participants in front or to the side of the microphone. The mic can pick up individuals from 25ft away.

VIDEO CONFERENCING APPS

Select “Microphone USB Codec” in the mic section and “Huddly IQ” in the camera section. If you aren’t using the boundary mic provided, the huddly cam has its own mic. Select “Huddly Mic” if you’re not using the boundary mic.

HUDDLY CAMERA

The Huddly IQ camera will auto-frame a speaker if they move around the room. Download the huddly app and make sure to select “auto” to enable this. If you want to pan/tilt/zoom the camera, de-select “auto” to do this.
